

Manufacturing Job Classification

Job Title: *(Manufacturing Technician)*

The individual shall be capable of manufacturing and assembling components to build machinery for the Packaging Industry. The individual shall be proficient in the use of all hand tools and machine shop related equipment.

Qualifications and Responsibilities:

- Keep a safe work environment, and work in a safe manner that does not endanger themselves or anyone else around them and to be able to identify any work hazards.
- It is important that the technician be qualified to do manufacturing work and have 3-5 years of experience in the manufacturing and assembly of production equipment.
- It is the responsibility of the employee to show up on time and ready for work on a daily basis.
- Some machine shop experience preferred.
- Must have a minimum of a high school diploma

Duties:

- Proficient in the use of all hand tools, saws, drills and taps. Prefer to have someone who is familiar with machine shop equipment, machining methods and blue print reading.
- Assemble all components of packaging machinery with little or no supervision.
- Some experience with pneumatic systems preferred.
- Perform proper care and use of metal working equipment as needed.
- Obtain Fork Truck training and operator certification while at ESS Technologies.

Equipment: (The following equipment must be operated in a safe and productive manner).
(Machine Shop Equipment, Fork Lifts, Metal Forming Equipment and other hand tools).
